

Whoosh3D™

Product Description

Whoosh3D™ lets you capture, convert, browse, stream, and view 2D and or 3D videos in auto-stereo (glasses-free) 3D on your very own iOS device. It can play original 3D videos glasses-free direct from YouTube, various online channels, and device-stored content. Whoosh3D™ users can even record their own videos through the mobile device's built-in camera and play back in 3D. The Whoosh3D™ app is a two-component solution; an app and 3D enabled screen. The Whoosh3D™ screen is available for the iPhone i6, i6s, i6Plus, i6sPlus, i7, i7Plus, iPad Mini Retina, and iPad Air, and enables these conventional 2D devices to create and view glasses-free 3D.

NOTE: The Whoosh3D™ screen attachment is required to create and or view 3D content. The Kit includes a unique serial number that is required to activate the Whoosh3D™ app and 3D functions. The Whoosh3D™ Kit includes a disposable installer to properly install and align the 3D-enabled screen into the device. The Whoosh3D™ Kit can be purchased through the app.

Features:

- Capture videos using the device's camera and playback in 2D, 3D, or VR mode.
- Stream original 3D video content (Side-by-Side, or Top/Bottom Format) and view in glasses-free 2D, 3D, or VR mode.
- Stream 2D video and play in 2D or convert to glasses-free 3D in real-time.
- Access to Streaming of 2D & 3D Videos from YouTube, selected internet channels, and IP cameras.
- Instant depth adjustment in real-time for personalized settings and viewing comfort.
- Instant switching between 2D, 3D, and VR mode.
- VR Mode: The app converts video content between 2D/3D/VR Mode for viewing only.
